

*Enterprise Solutions for Education*

**Applied IP is a leading provider of business technology solutions in the San Francisco Bay Area, offering Professional and Managed Services for the Education market (K-12 through Higher Education).**

We understand that the smaller your business, the more pressure you face to implement high-quality and cost-effective technology. So we work with small and medium businesses

to provide enterprise-quality solutions customized for your particular needs. We collaborate closely with customers to understand unique technical challenges, and come up with solutions to fit your budget.

***“Applied IP: offering small and medium organizations the enterprise-quality solutions and services you deserve.”***

We offer a complete suite of services for IP Surveillance, Security, Wireless and VoIP networking, as well as ongoing servicing customized for Education customers. We also offer a selection of equipment leases, allowing you access to the equipment you need at a price you can afford.

**The advanced technology solutions offered by Applied IP include:**

**IP Surveillance**

For improved campus-wide security, Applied IP offers leading-edge IP surveillance and video monitoring systems to protect the safety of your students, faculty, and capital assets. Offering more robust functionality than analog mounted cameras (CCTV), IP surveillance allows real time digital video of your observation area to be transmitted directly to the desktop. The ability to cull, zoom, and pan still images from the feed gives security personnel the information they need to keep your campus safer. ←

**Wireless**

Applied IP audits and analyzes your wireless network, and consults with you on best practices for campus voice and data communication. We specialize in the integration of mesh networks for campus-wide communication. And as an authorized Cisco reseller, we are on the leading edge of the rapidly evolving market for IPICS (Internet Protocol Interoperability and Collaboration Systems) technology. ←

**Service Support**

**Network Security**

**IP Surveillance**

**VoIP Networks**

**Wireless Networks**

**VoIP**

Applied IP can integrate Voice over Internet Protocol networks to be used for campus-wide voice applications such as telephony, voice instant messaging, and teleconferencing. ←

**Security**

Applied IP performs network security audits and analysis aimed at identifying security vulnerabilities in your IT infrastructure. Applied IP offers a complete suite of firewall and networking security solutions for Educational institutions, and is an authorized reseller of Cisco internet security technology. ←

**Support**

Applied IP can provide ongoing servicing of the systems we implement. Our support services in the San Francisco Bay Area are characterized by a level of on-site service and responsiveness that national providers simply can't provide. ←
